- Please list three specific goals that your firm would like to gain from participating in the program.
  - We are done work with contractors and developers, but would like to team up with large engineering firms on A&E and design-build projects
  - We would like to have to opportunity to work on large-scale public works projects but cannot bid that kind of work alone
  - We would like to hire more engineers and create future opportunities for growth and teaming/mentoring to smaller/newer firms than ours
- Please list three items that your firm brings to the relationship.
  - Our two Principals each have 30 years of experience in heavy civil and transportation planning/traffic engineering projects, respectively
  - We bring unique expertise in the design and construction of temporary structures (falsework, shoring, specialty forms), in planning, designing and constructing highways, bridges, dams, channels, and identifying solutions for complex projects
  - We are an SBE, DBE, WBE firm that can work on many different Project tasks, concurrently with and as an extension of the prime's staff
- Current certifications: (Check all applicable. Show certification number.)

SBE  UDBE  DBE  DVBE

- If not currently certified, are you planning to be SBE certified? Yes No
- Has your firm worked with any of the following agencies?
  - Caltrans Yes No
  - Metro / OCTA / RCTC / SANBAG / VCTC Yes No
  - Local Agencies Yes No
  - Other Governmental Agencies Yes No
- How long has your firm been performing A&E services? 1996 years
- What is your average annual revenue for the past three years? \$ 875,000 per year

## Mountain Pacific, Inc. Civil/Transportation Engineers

Mountain Pacific, Inc. is a multi-disciplinary DBE/SBE-certified woman-owned civil engineering firm specializing in the design of road and bridge construction projects, and transportation studies.

Mountain Pacific, Inc. was originally launched in 1996 with the purpose of providing cost effective and innovative solutions for heavy construction support and forming systems. Subsequently, services were expanded to include roadway design, traffic engineering, and transportation planning services. Currently, we are a small business,

growing, yet preserving our core values of providing personable, high quality, innovative solutions for our clients. The engineering team at Mountain Pacific integrate advanced engineering concepts, creative problem solving, and hands on construction expertise to provide a unique approach for optimal design results. Our heavy civil division has produced falsework, support of excavation, temporary bridge, concrete forming, and

specialized equipment design on over 800 successfully completed projects. Our transportation division has completed over 200 successful projects for government agencies and developers.

Mountain Pacific continually expands its staff and resources to ensure that full-service civil engineering expertise is provided to our clients during all

phases of design and construction. Indeterminate structures, foundations, and support of excavation designs are modeled with state of the art finite element analysis software, as well as in-house software. Traffic analyses are modeled with the latest industry standards. Our staff is licensed in 11 states, and we have completed work on significant infrastructure projects for public agencies such as the

LACMTA, LAMWD, OCTA, Caltrans, ADOT, UPRR/BNSF, ODOT, NMDOT, WSDOT, CDOT, and NDOT, amongst others. Our management structure and staffing allows us to provide personalized support from project conception to timely and profitable project completion.

We provide high quality innovative engineering regardless of project size.
