## CORPORATE PROFILE

A pioneer in groundbreaking scientific and engineering developments since the 1960s, TRC is a national engineering, consulting, and construction management firm providing integrated services to the energy, environmental and infrastructure markets. We serve a broad range of clients in government and industry, implementing complex projects from initial concept to delivery and operation.

A publicly-held corporation listed on the New York Stock Exchange (NYSE:TRR) – NYSE's oldest environmental firm – TRC includes over 3,000 technical professionals and support personnel at more than 100 offices throughout the U.S. and London. Our clients depend on TRC's multidisciplinary teams to design solutions to their toughest business challenges in these areas:

**Energy** - We provide comprehensive services to the energy industry including power generation and transmission, fuel pipelines, renewable resources, end-use energy management, and environmental protection.

**Environmental** - We help permit and develop major new construction and reconstruction projects, ensure compliance for continuing operations, and help identify and mitigate future risks.

**Infrastructure** - Through our engineering and construction support services, we help communities and businesses make improvements needed to support their growth.

Throughout the decades, the company has been a leader in setting industry standards and establishing innovative program models. TRC was the first company to conduct a major indoor air study as it related to outdoor air quality standards. We also developed innovative measurements standards for fugitive emissions and ventilation standards for schools and hospitals in the 1960's; managed the monitoring program and sampled for pollutants at EPA's Love Canal Project in the 1970s; developed the basis for many EPA air and hazardous waste regulations in the 1980s; pioneered guaranteed fixed-price remediation in the 1990's; and earned an ENERGY STAR Partner of the Year Award for outstanding energy efficiency program services provided to the New York State Energy Research and Development Authority in the 2000's.

We are proud to have developed scientific and engineering methodologies that are used in the environmental business today – helping to balance environmental challenges with economic growth. TRC experts are currently addressing some of our nation's most challenging issues including global climate change and energy independence.

The unparalleled strength of our diverse staff and firm commitment to solving our clients' toughest challenges has made TRC a trusted advisor. We not only share our clients' goals, we take responsibility for reaching them.

TRC provides practical and economical solutions to protect business interests while contributing to enhanced environmental quality and public health and safety. TRC has successfully completed thousands of Phase I and Phase II Environmental Site Assessments (ESAs), Site Investigation/Remediation, sustainability, and other projects for Federal, state, county and municipal clients, industries, and commercial businesses, and has experience evaluating all environmental media including air, surface water, groundwater, soils, and sediment. Our longevity and strong relationships are an important quality, assuring our clients that we will remain a constant asset well beyond the period of service. This has been confirmed by our experience working with hundreds of public clients here in southern California.

TRC has offices across the United States (U.S.) with technical professionals assisting clients with environmental and engineering services. With Corporate Headquarters located in Windsor, Connecticut, TRC provides a national presence. TRC has California offices located in Los Angeles, Irvine, San Diego, Fullerton, San Francisco, Sacramento, Mountainview, Bakersfield, and Concord providing local, professional services. The management and staff at TRC have specialized, extensive environmental consulting experience on projects throughout southern California. Project Management for Caltrans District 7 CalMentor Program will be run through TRC's Downtown Los Angeles office.
