FOR IMMEDIATE RELEASE

CALTRANS STATEWIDE LITTER PICKUP DAY

Calaveras County – The California Department of Transportation (Caltrans) held a statewide Litter Removal Day on Thursday, April 19, 2012, to pick up litter and debris along the state highway system and to educate the public about this costly issue.

Caltrans maintenance crews in Calaveras County picked up over 110 bags of litter and debris for the entire day from San Joaquin/ Calaveras County line on SR-12 to Haupt Creek Road.

There were two Calaveras County Adopt-A-Highway groups that participated with Caltrans for this event. They were:

- San Andres Community Covenant Church. They picked up along SR-49 near Airport Road to Gold Oak Road.
- Cathy Davis's Group. They picked up along SR-12 from Burson Road to east of Evans Road.

For more information on the Adopt-A-Highway Program, please visit www.adopt-a-highway.dot.ca.gov or call Kathy Cockayne, District 10 Adopt-A-Highway Coordinator, at (209) 948-7462.

The best anti-litter campaign is to ensure trash never makes it onto the highways in the first place. Caltrans encourages you to:

- Carry a litter bag in your automobile and always dispose of trash properly;
- Never discard cigarette or cigar refuse improperly;
- Always cover and properly secure loads of trucks and pick-ups.

With everyone doing their part we can keep California clean for today and the future.

NEWS RELEASE

Last year, Caltrans spent almost \$43 million on litter removal throughout the State Highway System. Over 150,000 cubic yards of litter were collected and disposed. That's about 9,500 Caltrans garbage trucks full of litter.

In addition to the economic costs, litter presents a wide range of serious threats to the environment and human health: Wildlife can suffer from plastics in the environment; roadside vegetation can be damaged by large debris; fires can be started from burning cigarettes that can threaten human health; harmful chemicals and biohazards can cause a serious threat to human health, litter can clog roadway drainage systems that can lead to wet-weather highway flooding, congestion, and accidents. Litter can aid in the spread of disease.
