## FOR IMMEDIATE RELEASE

### CALTRANS STATEWIDE LITTER PICKUP DAY

**Alpine/Amador County** – The California Department of Transportation (Caltrans) held a statewide Litter Removal Day and Enforcement Day on Thursday, April 21, 2016, to pick up litter, trash and debris along the state highway system and to educate the public about this costly issue.

Caltrans District 10 employees picked up 1,552 bags of litter, trash and debris in its eight counties – Alpine, Amador, Calaveras, Mariposa, Merced, San Joaquin, Stanislaus and Tuolumne.

A total of 205 bags of litter, trash and debris were picked up in Alpine and Amador Counties at the following locations:

- State Route 104 (SR-104) from SR-88 to SR-49;
- SR-88 from Dew Drop Road to Corral Flat Road;
- SR-124 from SR-88 to SR-16;
- SR-88 at the Amador/San Joaquin County line;
- SR-89 from Markleeville to California/Nevada State Line.

There also were two Amador County Adopt-A-Highway groups that participated with Caltrans for this event. Those groups were the Native Sons of the Golden West and the Amador County Democrats.

For more information on the Adopt-A-Highway Program, please visit [www.adopt-a-highway.dot.ca.gov](http://www.adopt-a-highway.dot.ca.gov) or call Kathy Cockayne, District 10 Adopt-A-Highway Coordinator, at (209) 948-7462.

The best anti-litter campaign is to ensure trash never makes it onto the highways in the first place. Caltrans encourages you to:

- Carry a litter bag in your automobile and always dispose of trash properly;
- Never discard cigarette or cigar refuse improperly;
- Always cover and properly secure loads of trucks and pick-ups.

- More -

# NEWS RELEASE

With everyone doing their part we can keep California clean for today and the future.

Last year, Caltrans spent \$76 million to remove 153,000 cubic yards of litter, trash and debris throughout the State Highway System, collecting enough litter to fill almost 10,000 garbage trucks. Parked end-to-end, those trucks would stretch more than 51 miles.

In addition to the economic costs, litter presents a wide range of serious threats to the ecosystem and human health: Wildlife suffers from plastics in the environment; roadside vegetation is damaged by large debris; fires are started from burning cigarettes and threaten human health; harmful chemicals and biohazards cause a serious threat to human health; litter clogs roadway drainage systems and can lead to wet-weather highway flooding, congestion, and accidents. Litter aids in the spread of disease.
