

## **Appendix A** California Environmental Quality Act Checklist

---

The following checklist identifies physical, biological, social, and economic factors that might be affected by the proposed project. The California Environmental Quality Act impact levels include “potentially significant impact,” “less than significant impact with mitigation,” “less than significant impact,” and “no impact.”

Supporting documentation of all California Environmental Quality Act checklist determinations is provided in Chapter 2 of this Initial Study/Environmental Assessment. Documentation of “No Impact” determinations is provided at the beginning of Chapter 2. Discussion of all impacts, avoidance, minimization, and/or mitigation measures is under the appropriate topic headings in Chapter 2. A summary of mitigation and minimization measures can be found in Appendix D.

**MANDATORY FINDINGS OF SIGNIFICANCE -**

a) Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, or cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?

b) Does the project have impacts that are individually limited, but cumulatively considerable? (“Cumulatively considerable” means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?

## **Appendix B** Resources Evaluated Relative to the Requirements of Section 4(f)

---

This section of the document discusses parks, recreational facilities, wildlife refuges, and historic properties found within or adjacent to the project area that do not trigger Section 4(f) protection under the U.S. Department of Transportation Act of 1966 either because 1) they are not publicly owned, 2) they are not open to the public, 3) they are not eligible historic properties, 4) the project does not permanently use the property and does not hinder the preservation of the property, or 5) the proximity impacts do not result in constructive use.

In 2005, Section 6009(a) of the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy of Users (SAFETEA-LU), Publ. L. 109-59, amended existing Section 4(f) legislation to simplify the processing and approval of projects that have only *de minimis* impacts on lands protected by Section 4(f). This revision provides that once the U.S. Department of Transportation determines that a transportation use of Section 4(f) property, after consideration of any impact avoidance, minimization, and mitigation or enhancement measures, results in a *de minimis* impact on that property, an analysis of avoidance alternatives is not required and the Section 4(f) evaluation process is complete.

Dusty Campground, located on National Forest System lands and managed cooperatively by the Forest Service and PG&E; and the Pacific Crest Trail, a national scenic trail that crosses through publicly and privately owned land, are two publicly owned recreational resources within or adjacent to the project area. Seven-campsite Dusty Campground is located approximately 2,300 feet from the existing bridge around a bend in the lake and is accessed via a gravel road. Construction on the northern end of the replacement bridge would mean delays for campers driving to and from the campground. The Pacific Crest Trail is located adjacent to McArthur-Burney Falls Memorial State Park at SR89. The project will realign the Pacific Crest Trail at this location, which has the approval of the Lassen National Forest (see Appendix J). The Forest Service is the agency that manages publicly owned federal lands in the project area. Construction may mean minor delays for hikers on this trail during some portions of project construction.

The proximity impacts to the Dusty Campground and the Pacific Crest Trail would be minor, or *de minimis*, as specified in Section 6009(a) of SAFETEA-LU. The activities, features, and attributes of these resources will remain intact both during and after construction, and impacts would be minimal. Access through the construction site would be provided for users of both of these resources. Nighttime, holiday and weekend work would be limited. Visitor use levels are highest on weekends, particularly holiday weekends. Implementing this measure would ensure that most visitors to the area are not affected by construction. Road connections to the Dusty Point Campground will be upgraded to improve safety and match the new highway improvements. No further Section 4(f) evaluation is required.
