Used Oil/Antifreeze	X	
Paint	X	
Other Hazardous Waste	X	

Promotional Programs

This section of the annual report presents the methods in which your agency informed both employees and customers served that a recycling program was being implemented. Below are identified the programs you reported were continued or implemented during 2008.

Procurement Activities Implemented in 2008

This section of the annual report presents your compliance with the State Agency Buy Recycled Campaign (SABRC). The activities identified below were reported as implemented or continued during 2009. (Note: Completing this section does not meet the [SABRC reporting requirements](#) (PCC Section 12162(b)).

Question/Answer

1) Is the mission statement of your State agency/large State facility the same as reported in the previous year?

Yes

2) What changes have there been in the waste generated or disposed by your State agency/large State facility during the report year? (For example, changes in types and/or quantities of waste.) Explain, to the best of your ability the causes for those changes.

To my knowledge there have been no significant changes in the type or amounts of waste that we generate. Bear in mind that one single construction project can double or triple the amount of waste that District 10 sends to the dump in a single year.

3) Explain any changes to waste diversion programs that were continued from the prior report year. Be sure to indicate the reason for making the changes.

We have not made any changes.

4) Explain any waste diversion programs that were newly implemented or were discontinued during the report year and explain why.

We added some recycling bins to the District Office. We also began to move away from battery powered air freshners throughout the DO to cut down on that particular waste stream.

5) What types of activities are included in each of the waste diversion programs you continued or newly implemented during the reporting year?

Our Business Source Reduction includes the use of e-mail for communication, the posting of various newsletters and job opportunities on bulletin boards, on-line forms, double sided copying, recycling of toner cartridges, and reuse of envelopes.

We separate our white paper from the cardboard and we reuse enormous amounts of recycled concrete and rubble in our construction projects.

All of our hazmat products tires, oil, batteries, e-waste etc. are stored, disposed of or recycled in the appropriate manner.

6) What resources (staff and/or funds) did your State agency/large State facility commit toward implementing its Integrated Waste Management Plan during the report year to help reduce disposal and meet the diversion mandate?

Recycling reports were collected from all Caltrans Resident Engineers that work on projects that require a CEM-4401 (Solid Waste Disposal and Recycling Report)

Data was collected from Maintenance management and The Division of Equipment. I am directed to spend 5% of my time implementing and preparing the plan and report.

7) Has your State agency/large State facility adopted or changed its waste reduction policy?

No

8) Explain how you determined the reported tons disposed? (e.g. waste assessments, per capita generation and extrapolation, actual disposal weights, etc.)

The bulk of the reported tonnage comes from our construction field offices. A single project can generate hundreds of tons of waste just as easily as they can generate thousands of tons of recyclable products. These amounts are reported to me during the year on a 'Solid Waste Disposal and Recycling Report'(CEM-4401). Additional tonnage comes from our waste disposal contractors, based on average loads and the regularity of the pick ups.

9) Please provide a definition of “employee” for your State agency/large State facility. Also, what is the source of the reported number of employees and visitors/students/inmates, etc. (as applicable)?

The vast majority of the reported 'employees' are in fact Caltrans staff. This data I collected from human resources, construction field offices and Maintenance Management. Our security guards at the main entrance to the District Office in Stockton log in all visitors to the facility. Visitors to Maintenance and Construction offices are negligible.
