California Transportation Commission  
1120 N. Street  
Room 2221 (MS-52)  
Sacramento, CA 95814

Dear Transportation Commission Member:

On behalf of the Tahoe Transportation District, a bi-state special transportation district, I want to express our strong support for the allocation of the State Transportation Improvement Program (STIP) funds to the Kings Beach Commercial Core Improvement Project (KBCCIP).

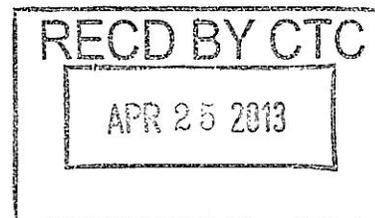

This project has been well over 15 years in the planning and community outreach phase. The public process was extensive and inclusive, looking at several alternatives in the EIR that were discussed, developed and analyzed with the community. In the end, the vast majority of the citizens, businesses and agencies support the chosen alternative.

The Kings Beach project is one of the major highway improvements of import in the Regional Transportation Plan. This Complete Streets project is a major highway-related community project that helps transform the built environment at Lake Tahoe for the better. This public investment will spur adjacent private sector investment, bringing the area up-to-date and compliant with desired environmental, economic, and community improvements.

I recommend you allocate the identified STIP funds to the KBCCIP and make this project a reality for the Tahoe community.

Respectfully,

Carl Hasty  
District Manager
